

Chapter 10: Tree-Level Scattering and Decay Processes

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Computes foundational QED processes such as electron-muon scattering, Bhabha scattering, Møller scattering, Compton scattering, pair annihilation, and pair production, with attention to cross sections, phase space, and spin averaging.
