

## **Chapter 13: The Full Shor Factoring Algorithm**

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Assembles the complete algorithm step by step: random base selection, quantum order finding, measurement, classical postprocessing, continued fractions, and gcd extraction. The chapter presents the full workflow in mathematical form and pseudocode.
