

## Chapter 16: Worked Examples by Hand

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Walks through small cases such as factoring 15 and 21, showing the classical reduction, the periodic function, the quantum measurement logic, the continued fraction step, and the final gcd computation. The goal is to make every moving part concrete.
